

I Am Portable Hybrid Trailer

Cage: 65FB6

Duns: 831328336

Year Established: 2010

About Us:

Founded in 2010, I am Portable Hybrid Trailers will be shaping the way future transportation is designed. The I Am Portable hybrid trailer presents an eco-friendly, state-of-the-art solution to tractor-trailer safety needs, energy efficient transportation, and on-site technology. The portable trailer brings together 21st century engineering, design and manufacturing that brings the over-the-road trucking and transport industry into a new era. The portable trailer incorporates clean energy use through hydrogen vaporizer technology which essentially eliminates pollution created by the commercial truck engines and burning of fossil fuels. Power creation systems built from renewable sources -- wind and solar -- can be embedded and packaged with the trailer. The I Am Portable Trailer business model will drive a profitable enterprise through sales and distribution throughout the commercial trucking and transportation industry. Sales of the I Am Portable units will include trailers, trailer-container combinations, and retrofitting of units to existing semi-trucks. Trailers will also be available for lease following standard industry protocols and lease agreements.

The Concept:

The I Am Portable Hybrid Trailers Corporation is seeking initial investment funding of \$1 million. These funds will be used to create manufacturing, operations and marketing sections of the company in order to proceed with the company's plans. Raising capital from individual and institutional investors will also be part of the initial operations of the company. Sources will be used to raise an additional \$5 million as the company begins its operations to seed primarily manufacturing and marketing activities. Approximately 9,000,000 shares will be issued by the company in return for investor capital. Mr. Ronald Brown, the inventor and patent holder of the I Am Portable Hybrid Trailer will retain majority share in the corporation. The company expects to become a sizable operation in a short amount of time, achieving \$50 million in revenue in year 2, and then maintain 5% revenue growth each year thereafter. Expenses will include normal production, operating and marketing expenses. We expect cost of goods sold to average about 50% of total sales.

Naics Codes:

- **237990** – Other Heavy and Civil Engineering Construction
- **332510** – Hardware Manufacturing
- **238290** – Other Building Equipment Contractors
- **221113** – Nuclear Electric Power Generation
- **221119** – Other Power Generation
- **336611** – Ship Building and Repairing
- **334513** – Instruments and Related Products Manufacturing for Measuring, Displaying, and Controlling Industrial Process Variables.

Specs of Trailers:

Video Presentation: www.wemoteam.com:2080/iamportable

- air ride spring suspension system
- low profile tires
- the crane embedded in 2 feet trench, embedded in the storage area, of the 3ft. height, and 140 -160 degree chassis frame
- Potential Height of Crane – 100 Feet.
- load capacity of 35-45 thousand pounds
- 4 Support Arms on the Trailer as well as Crane
- Trailers from 30 feet, 45 feet, and 53 feet, at 102" wide.
